EXAMINER MENDIRATTA: Number of segments in any given lane, as shown in your drawings, is proportional to the probability of rolling a two casino dice combination, the sum of which is equal to that lane number. It appears to be directly proportional.

You are free to submit a response by the deadline.

No additional payments are required with response.

ATTORNEY WINTERS: Purpose of "universe proportional rule" is to decrease a player's chances of completing his course in inverse proportion to that player's probability of rolling a combination that allows his piece to move. I will redraft claims to be in accordance with the drawings.

Very respectfully,

David Douglas Winters
